### DETAILED ACTION

1. This office action is in response to communication filed 10/6/2006.
2. Claims 11-13 have been added. Claims 1-5 and 11-13 are presented for examination.

#### **Claim Rejections - 35 USC § 102**

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-4, 11-13 are rejected under 35 U.S.C. 102(e) as being anticipated by Wisner (6,385,596 hereinafter Wisner).

With respect to claims 1-4, 11-13, Wisner teaches digital music file distributed through a computer communication network (Abstract). Producing an advertising digital music file by deteriorating or damaging a sound quality of an original music file of a record of an original music file of a record of a cooperating record cooperation (i.e. the un-encrypted versions of a song are either selected portions, or the entire song, but recorded with lesser quality, such as increased compression, different audio image or waveform and/or lower sample rate. These un-encrypted lower quality clips are available for free for previewing by the customer in order to decide whether or not to

purchase the high fidelity version)(See col. 12, lines 12-15 and Figure 8); distributing the advertising digital musical file through the computer communication network (Figure 8).

**Claim Rejections - 35 USC § 103**

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Wiser.

Claim 5 recites deteriorating the sound quality by converting a multi-channel sound of the original music to a single channel sound. Since, Wiser teaches using different methods of deteriorating the sound quality of the original music, such as different audio images, different bandwidth etc. (col. 12, lines 12-15) then it would have been obvious to have included in Wiser, the well known method of converting a multi-channel sound into a single channel sound as one of the different methods of deteriorating the sound quality of the music.

**Response to Arguments**

5. Applicant argues that Wiser doesn't teach that the sound quality of an original music file is either deteriorated or damaged to produce an advertising digital music file. The Examiner wants to point out that in the case that descriptive information is added to the song, The artist doesn't record 2 songs one without descriptive information and one

Art Unit: 3622

with descriptive information as suggested by the Applicant, but instead one entire song is recorded by the artist and then descriptive information is added to the recorded song and available to the users for free as an un-encrypted version (col. 3, lines 50-63).

### **Conclusion**

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
